

Instructions:

Once you're in the current directory you've unzipped this assignment to, in the command line type in:
'python3 search.py [start node] [goal node]'

Here is an example:

The screenshot shows a terminal window titled 'Terminal' with a menu bar containing 'File', 'Edit', 'View', 'Search', 'Terminal', and 'Help'. The terminal output shows the command `python3 search.py [2 0 3 4 1 5 7 8 9 6 10 12 13 14 11 15] [1 2 3 4 5 6 7 8 9 10 11 12 13 14 15 0]` being executed. The output of the script is `Solution found! Please refer to 'output.txt'`. The terminal window is part of a desktop environment with a sidebar on the left containing various application icons.

Once you've run your test case, you will see the program's output in the text file 'output.txt.'
